HÖEGH LNG

Adaptive

On top of existing systems

“VesselMan is fully integrated with Amos work orders, purchases and components. The cloud based integration saves us a lot of work and streamlines the docking project in a way that gives us much better control and transparency”

– Mr. Anders Tønnessen, Maintenance Superintendent, Høegh LNG

VesselMan gives us better control of cost, variation orders and progress on critical jobs

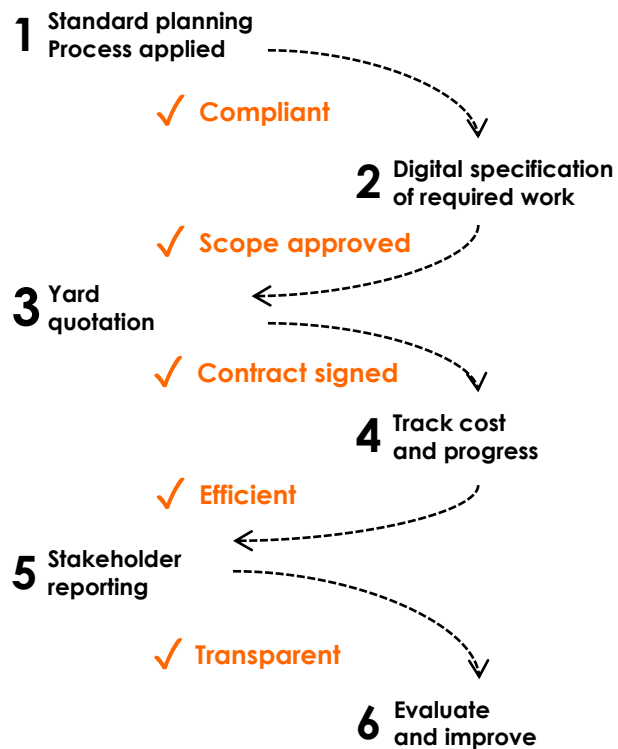

– Mr. Eirik Sanderlien, Fleet Manager, Transpetrol TP

Transparent

Out of the box

Cost reduction | before and after

Modern and transparent

Improved customer value – information sharing

Management/owner can monitor progress “at home”

Attractive company – modern way of work - digitalization

- Reduce days in dock with 1 day & Reduced risk of off-hire
- Order spares & Services in due time (% reduction)
- Compare and negotiate terms (% reduction)
- Reduced scope of variation orders (% reduction)

Continuous Improvements

Less time used on management operations and tracking of status

Improved quality (Re-usable specifications)

Less people dependent – easier to on-board and collaborate

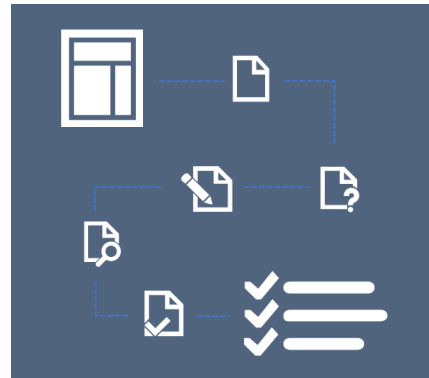

Key components and benefits

DIGITAL COLLABORATION

An easy to use responsive user interface ensures smooth collaboration across your value chain

MASTERPLAN

Procedures are configured as templates that ensures all parties will follow a context-based and systematic flow

SPECIFICATION

A technical project is launched, staff and specialist identified, quotation, tracking and management reporting are managed

REPORTS

The solution provides insight reports and straight-forward dashboards for management and stakeholders.
