

VESSELMAN

PGS | onboard

PGS agrees to enter into a pilot with | VesselMan

VesselMan is proud to announce a new client relationship with Petroleum Geo-Services (PGS). PGS is a leader in the offshore seismic industry and operates the market's youngest fleet which consists of eight 3D vessels (six in the low season). Additional cold-stacked capacity comprises five older Ramform vessels, plus one conventional ship. They have three hubs in Europe and North America and has offices in 15 countries around the world. The PGS head office is in Oslo, Norway and the PGS share is listed on the Oslo stock exchange.

PGS will leverage VesselMan's cloud-based solution for lean collaboration and effective management of dry-dockings.

This achievement demonstrates the abilities of VesselMan, a genuine cloud-based management system that streamlines dry-dockings and ship repairs. VesselMan is easy to implement on top of your existing systems, at a fraction of the traditional cost and time.
